INTRODUCTION

Information and Cell phones and other communi-Communication medi-Technologies" cation stands for ICT. ICT ums. Modern refers to technolo-information and gies that provide ac- communication cess to information technologies through telecommu- have created nications. It is simi- "global village," in Information which people can Technology (IT), but communicate with focuses primarily on others across the communication tech- world as if they're nologies. This in-living next door. cludes the Internet. Wireless networks.

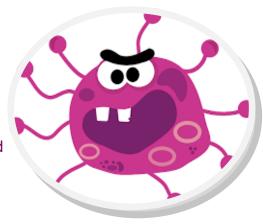

The two main compo

#1 The two main component in IT (Information Technology) are hardware and software. But there is also a lesson know 'grey' component. This is the software that is stored in hardware and cannot be modified easily. It is known as 'FIRMWARE'

Types of ICT

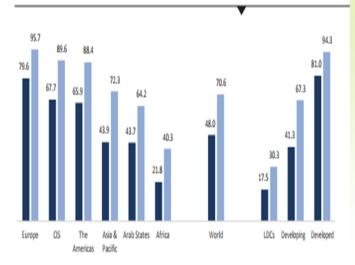

- * Radio
- * Television
- Telephony (landlines and cellular/mobile Phone
- * Computers

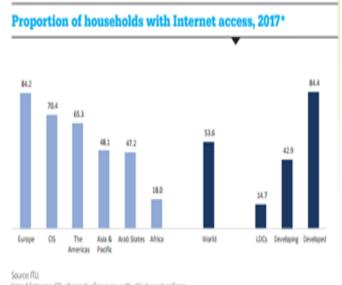

Statistical data of ICT

Proportion of individuals using the Internet, by age, 2017*

■ Total population ■ Ages 15-24

Note: * Estimates. CIS refers to the Commonwealth of Independent States.

#2 "This year

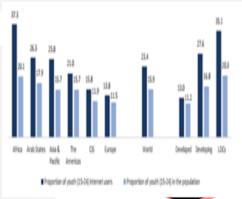

marks the 25th anniversary of the ITU Telecommunication Development Sector. Over the past two and a half decades, ITU has contributed to the unprecedented development of ICTs worldwide and the wider transformation they have brought to society. are at the forefront of today's digital economy with 70 per cent of the world's youth being online. Today's ICT development is driven by the spread of mobile-broadband services. The growth of mobile broadband has largely outpaced

NET-A-HOLIC TEENS

The proportion of young people aged 15-24 using the Internet (71%) is significantly higher than the proportion of the total population using the Internet (48%).

Young people represent almost one-fourth of the total number of individuals using the Internet worldwide.

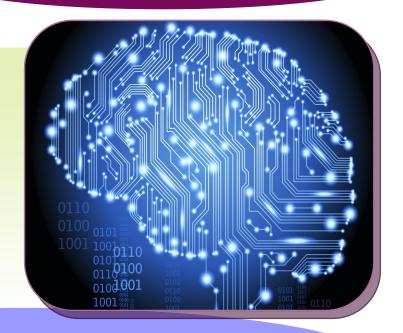

In LDCs, 35% of the individuals using the Internet are young people aged 15-24, compared with 13% in developed countries and 23% globally.

WHO AM 1???

Triva

#3 The computer mouse was invented by Doug Engelhard in 1963. It was made of wood.

ADVANTAGES OF ICT

- Processing of data is much faster on a computer.
- Repetitive processing can be better done using computerised machinery.
- Searching for data is much faster.
- Data can be output on a computer in a variety of different formats.

ICT IN EDUCATION

ICTs can enhance the quality of education in several ways: by increasing learner motivation and engagement by facilitating the acquisition of basic skills, and by enhancing teacher training. ICTs are also transformational tools which, when used appropriately, can promote the shift to a learner-centred environment.

According to an African proverb, a person who asks questions understands a new language faster.

Using the Internet for educational activities provides a different avenue for discovery through questioning, and for critical evaluation of information. It is also important that we answer students' questions properly and timely. This is why we must constantly retrain according to the needs of the time. For this information age, we must be vexed with the personal and educational uses of the Internet.

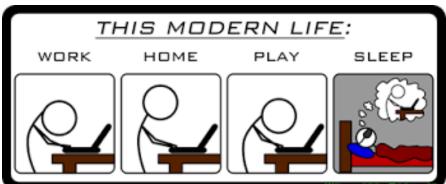

Negative impact of Dependence on

ICT

- Isolation
- Lack of Social Skills
- Poor sleep habits
- Obesity
- Lack of privacy
- High level of Deceit

DID ANONE ELSE READ THIS STORY ABOUT HOW ELECTRONIC GADGETS UNDERMINE OUR ABILITY TO FOCUS AND CONCENTR... DARN! THE PADRES LOST YESTERDAY...

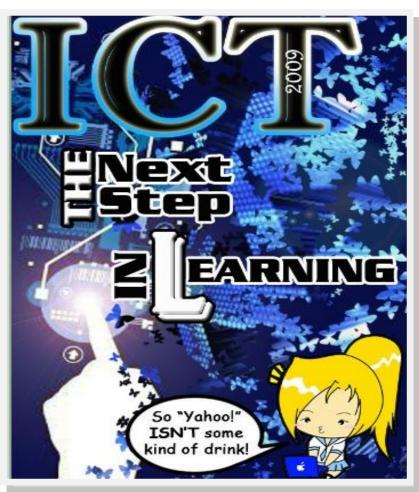

The impact of technology on our social, mental, physical and environmental health can be devastating if we don't keep ourselves in check. There's no denying the benefits we have gained from technological advancements, but as with all things in life moderation is key. will help you avoid any unnecessary pitfalls.

Technology is anything that wasn't around when you were born. **- Alan Kay**

Any sufficiently advanced technology is equivalent to magic. - **Arthur C. Clarke**

One machine can do the work of fifty ordinary men. No machine can do the work of one extraordinary man. - Elbert Hubbard (Author)

Technology made large populations possible; large populations now make technology indispensable. - **Joseph Krutch (Writer)**

The real danger is not that computers will begin to think like men, but that men will begin to think like computers. - **Sydney**

The art challenges the technology, and the technology inspires the art. - **John Lasseter (Director)**

Computers make our life easy as well as making us lazy .Before computers were invented people had the time to go for holidays with family, visit friends wish people on their birthdays, anniversary personally but today because of ICT people just send a message or just Google about the place sitting

at home .we depend on ICT for every little thing whether is it information or finding a friend instead reading about something in a book or calling a friend . Today in the day of Facebook we make friends with people we do not know or chat with people we do not know rather than speaking to those around us .
